

Immunization Requirements for Students and Visiting Graduated Students

Provision of immunization documentation as noted below is one of the requirements at TTUHSC-EP (Policy: **HSCEP OP 75.11**)

Documentation of required immunizations and titers must be uploaded to Texas Tech Health Manager Portal: [TexasTechHealthManager](#)

Immunization Requirements:

Varicella (Chicken Pox): Proof of immunity determined by serologic titer. In the event of a negative titer, two doses of Varicella vaccine at least 28 days apart is required.

Measles (Rubeola): Proof of immunity determined by serologic titer. In the event of a negative titer, two doses of MMR at least 28 days apart is required.

Rubella (German Measles): Proof of immunity determined by serologic titer. In the event of a negative titer, two doses of MMR at least 28 days apart is required.

Mumps: Proof of immunity determined by serologic titer. In the event of a negative titer, two doses of MMR at least 28 days apart is required.

Hepatitis B: Proof of immunity determined by serologic titer. In event of a negative titer, a second series and re-titer is required as recommended by the Center for Disease Control and Prevention. This series must begin prior to clinical start date, but may be completed after arrival.

Tetanus/Diphtheria/Pertussis: One dose of adult Tdap. If adult Tdap is more than 10 years old, provide date of last Td or Tdap.

COVID-19 Vaccine: TTUHSC-EP strongly recommends that you are vaccinated for COVID-19. However, you are not required to disclose whether or not you have received the COVID-19 vaccine to TTUHSC-EP. Any disclosure of your COVID -19 vaccination status is voluntary.

Meningococcal Vaccine: Documentation of current vaccine (if age < 22)

Flu vaccine: when in season ~ September to March

Tuberculosis clearance:

Documentation of 2 negative TB skin tests within the last 2 months of your start date, OR documentation of one negative test 2-12 months, then complete one TB skin test within the last 2 months of your start date, OR documentation of a negative TB lab test (T-SPOT, QFT-Gold) within the last 2 months of your start date.

If you have a history of a positive TB skin test, documentation of the positive TB skin test or lab test, a chest x-ray, and medication prescribed, if any, is required. BCG vaccine does not preclude the need for TB skin testing.
