	<b>Embracing the Dream – Martin Luther King Jr. Day Celebration 104V-C</b>
	<b>First Do No Harm: Total Patient Care for Intersex</b> 'Intersex' describes a range of conditions in which a person is born with mixed or ambiguous sexual anatomy. This video argues for a new understanding of this condition and for a new, patient-centered standard of care.
	<b>Health Disparities (Bell – Ford) January 04, 2005</b>
	<b>Hispanic Heritage Month</b>
	<b>Indian Artifacts</b>
	<b>Rene Coleman</b>
	<b>Scientific American Frontiers: A Different Way To Heal?</b>
	<b>Scientific American Frontiers: Affairs of the Heart</b>

## VHS Movies & Lectures

---

	<p><b>Scientific American Frontiers: Bionic Body</b></p>
	<p><b>Scientific American Frontiers: Season XII: Gene Hunters</b>  Alda meets some of the brightest gene-hunting scientists today, including Nobelist Jim Watson, the Human Genome Project's Eric Lander and developmental geneticist Nancy Hopkins. He also examines a controversial gene therapy project that's attempting to grow new blood vessels in diseased hearts.</p>
	<p><b>Special Guest Speaker – Johnston -- November 1, 2004</b>  Lecture Series</p>
	<p><b>The Other Angels</b>  Patricia Walsh is the first war nurse to produce, write, and direct a film about women in war. The Other Angles is a story of innocent Vietnamese caught in the crossfire, and the courageous civilian medical teams who fought to save their lives in primitive hospitals. But I is also a story of love and loss.</p>
	<p><b>That Spirit, That Thing Inside</b>  Seven American Indian and Indian and Hispanic/Latino nursed – both women and men, at various stages in their profession – describe how their lives led them to nursing careers, the educational barriers and successes they experienced, and the ways in which they have used their nursing expertise to serve their families, their tribes, and their communities.</p>
	<p><b>The Hidden Disability, Sherry Sancibrian, MS, CCC-SLP</b></p>
	<p><b>Transfusion Alternative Health Care, Meeting Patient Needs and Rights</b>  Health-care professionals are keenly interested in meeting each patient's medical needs. Thus, they welcome new therapies and approaches that can help them do this. They realize, too, that governments and society are increasingly giving attention to the patient's ethical views and legal rights.</p>
