Rx for Survival—A Global Health Challenge: Delivering the Goods

One of the major health challenges of the 21st century is bringing public health interventions and programs to as many people as possible as quickly as possible. The barriers to global health are often overwhelming, and overcoming these barriers takes imagination, nerve, leadership, and compassion. This segment of *Rx for Survival* features examples of individuals and organizations on the forefront of meeting the numerous health needs of the world's poorest, sickest, and most isolated populations. See the impact Riders for Health is having in Africa, meet Thailand's AIDS warrior, follow two volunteers with Doctors Without Borders, and learn how BRAC is transforming Bangladesh.
