J. MANUEL DE LA ROSA, M.D

jmanuel.delarosa@ttuhsc.edu
Phone: (915) 545-6510

Jose Manuel de la Rosa, M.D., is currently the Regional Dean for Texas Tech University Health Sciences Center School of Medicine in El Paso.

Prior to assuming the position of Regional Dean, Dr. de la Rosa served in the Department of Pediatrics as an Instructor, Assistant Professor, and Associate Professor. His involvement in the community included the establishment of the Kellogg Community Partnership Clinics. Four school-based clinics that provide services to colonia residents in El Paso's lower valley.

As a part of this involvement, Dr. de la Rosa became heavily involved in the political discussion over water rights to colonia residents. He served as a spokesman for the rights of colonia residents to water, services through the city, and was a lead proponent for passing the Texas Colonia Water Rights Bill. He served as a spokesman on multiple times on national public radio, Life Magazine, Dallas Morning News, and other media outlets to focus the attention of the nation on Border health issues. He has continued his involvement in advocating for the Border by testifying before State interim committees of the Texas Legislature. He was appointed by President Bush to serve on the Border Health Commission.

Early in his academic career at Texas Tech, Dr. de la Rosa assumed the position of Assistant Dean for Educational Programs. As such, he was responsible for supervising the Offices of Student Affairs, Graduate Medical Education (Residency Programs), and Continuing Medical Education. He was instrumental in combining these three offices in one functional Office of Medical Education. As part of his duties at Texas Tech he was able to integrate his community involvement with the school-based clinics with his academic endeavor by designing an experimental curriculum in community medicine. This curriculum allowed medical students at TTUHSC-El Paso to rotate through colonias making them aware of the need for cultural sensitivity in the practice of

medicine. This curriculum has been a model for national teaching efforts in cultural sensitivity, cultural awareness, and cultural competence in medicine.

After being named Regional Dean for the School of Medicine at TTUHSC-El Paso, Dr. de la Rosa set a goal of bringing a full-fledged four-year medical school campus to the El Paso community. The four-year campus would bring the full resources of a medical school/health sciences center enterprise to our community which could benefit from the education service, research, and policy initiatives defined by a health sciences center. Dr. de la Rosa is known as a collaborator with multiple institutions as well as a community service activist throughout our County.

In addition to his career objectives, Dr. de la Rosa is active with the Catholic Foundation for the Diocese of El Paso. He is active on the state level with school based health center initiatives through the Texas Pediatric Society and the Texas Medical Association's Council on Medical Education. He is active on several advisory committees at the University of Texas at El Paso. Dr. Jose Manuel de la Rosa is married to Maureen Anne Cannon. They have six children and are active in the Religious, social, and academic lifeblood of El Paso.
