

Appendix C – Op Log Expectations Mind & Medicine

Students are expected to log each patient that they see throughout block. The LCME guidelines are that each student should see a minimum number of cases from diagnostic categories. The Clerkship Director and/or the Assistant Clerkship Director will review each student's Op-Log during Mid-Clerkship Feedback. This will help monitor the types of patients that the student has seen and identify deficiencies which would need to be addressed by the Clerkship Director or coordinator. It is the student's responsibility to alert the Clerkship Director if a required diagnosis has not been seen by the student by his midterm evaluation. The Clerkship Director will provide the student with simulated cases, case histories or notify an attending to provide an appropriate case.

Students are encouraged to stay current with their online log and enter the cases seen daily. The clerkship coordinator will be monitoring the log weekly to make certain that each student is entering the appropriate number of patient encounters.

In addition to the required diagnoses, the student must see a minimum total of **30 patients in Internal Medicine, 30 patients in Psychiatry, 30 patients in Family Medicine, 10 patients in Neurology, and 13 patients in Emergency Medicine.**

Minimum level of student involvement:

- **Observe:** The student observes others interacting with, and/or examining the patient, or performing a procedure, but the student does not participate directly in the process. This is a passive experience from the standpoint of the interaction of the learner and patient.
- **Participate:** The student participates with a supervising physician (resident or attending) in interviewing, and/or examining a patient, or performing a procedure.
- **Perform:** The student performs the history or physical exam AND formulates the differential diagnosis AND suggests the appropriate course of treatment under supervision of the preceptor, resident, or attending. For procedures, the student plays a primary role in performing the indicated procedure under supervision of the preceptor, resident, or attending.

Required Diagnosis	EM		FM		IM		Neuro		Psych	
	Setting	Involvement & # required	Setting	Involvement & # required	Setting	Involvement & # required	Setting	Involvement & # required	Setting	Involvement & # required
Abdominal Pain	OPT	Perform	OPT	Perform(2)						
Acute Kidney Injury or AKI on CKD					IPT	Perform (1)				
Neurodevelopmental Disorder (Including IDD, Communication Disorder, ASD, ADHD, LD)									E	Participate, Perform (1)
Allergic Rhinitis			OPT	Perform (2)						
Altered Mental Status					IPT	Perform(1)				
Anemia					IPT	Perform (2)				
Bipolar I or Bipolar II									E	Perform (1)
Cancer diagnosis					IPT	Perform (1)				
Chest Pain	OPT	Perform	OPT	Perform (2)	IPT	Perform (2)				
Cluster A, B, or C Personality Disorders									E	Participate, Perform (1)
Congestive Heart Failure exacerbation					IPT	Perform (1)				
Neurocognitive Disorder (mild NCD, Major NCD, Delirium)							E	Perform (1)	E	Participate, Perform (1)
Diabetes Mellitus/DM Complications (e.g foot infection, cellulitis/ulcer or DKA/HHS)			OPT	Perform (2)	IPT	Perform (2)				
Epilepsy/Seizure							E	Perform (1)		
Gastrointestinal Bleed (upper or lower)					IPT	Perform (2)				
Generalized Anxiety Disorder									E	Perform (1)

Required Diagnosis	EM		FM		IM		Neuro		Psych	
	Setting	Involvement & # required	Setting	Involvement & # required	Setting	Involvement & # required	Setting	Involvement & # required	Setting	Involvement & # required
Hypertension/Hypertensive crisis			OPT	Perform (2)	IPT	Perform (1)				
Infectious Disease of the Nervous System (Viral encephalitis or bacterial meningitis or fungal meningitis)							E	Participate, Perform (1)		
Liver cirrhosis or ascites or hepatic encephalopathy					IPT	Perform (2)				
MDD (single or recurrent)									E	Perform (1)
Movement Disorder (Hypokinetic or Hyperkinetic)							E	Perform (1)		
Neuromuscular Disorders							E	Perform (1)		
Post-traumatic Stress Disorder (PTSD) or Other Trauma- and Stressor- related disorder									E	Participate, Perform (1)
Palliative/End of Life Care			OPT	Participate, Perform (2)						
Pancreatitis, acute					IPT	Perform (1)				
Pharyngitis			OPT	Perform (2)						
Physical exam, routine			OPT	Perform (2F, 2M)						
Pneumonia					IPT	Perform (1)				
Schizophrenia or other psychotic disorder									E	Perform (1)
Stroke or TIA					IPT	Perform (1)	E	Perform (1)		
Suicidal Ideation									IPT	Observe
Substance use disorder (alcohol, drug) OR alcohol or opiate withdrawal					IPT	Perform (1)			E	Participate, Perform (1)
Upper Respiratory Infection			OPT	Perform (2)						
UTI/Urosepsis					IPT	Perform (1)				

*Setting: Outpatient -this includes the Emergency Department (OPT), Inpatient (IPT), Either Inpatient or Outpatient (E)
