Methodology

This report updates mappings found in the Annual Report for 2015-2016 and the PGO reports released 9 January 2017. Updated information provided by Dr Maureen Francis, Assistant Dean for Medical Education – Clinical Affairs. Dr Francis worked with the clerkship directors to refine the PGO linkages for both the course and the assessments. They particularly focused on linking assessments to the PGOs the course directors identified as being taught in the clerkship.

Updated additions are marked with a dot (●).

PGO 1

Goal: Patient Care: Provide patient-centered care that is compassionate, appropriate and effective for the treatment of health problems and the promotion of health.

- 1.1: Gather essential information about patients and their conditions through history taking, physical examination, and the use of laboratory data, imaging studies, and other tests.
- 1.2: Make informed decisions about diagnostic and therapeutic interventions based on patient information and preferences, up-to-date scientific evidence, and clinical judgment.
- 1.3: For a given clinical presentation, use data derived from the history, physical examination, imaging and/or laboratory investigation to categorize the disease process and generate and prioritize a focused list of diagnostic considerations.
- 1.4: Organize and prioritize responsibilities in order to provide care that is safe, efficient, and effective.
- 1.5: Recognize a patient requiring urgent or emergent care, and initiate evaluation and management.
- 1.6: Describe and propose treatments appropriate to the patient's condition and preferences.
- 1.7: Accurately document history, physical examination, assessment, investigatory steps and treatment plans in the medical record.
- 1.8: Counsel and educate patients and their families to empower them to participate in their care and enable shared decision-making.
- 1.9: Provide preventative health care services and promote health in patients, families and communities.

PGO 2

Demonstrate knowledge of established in the evolving biomedical, clinical, epidemiological, socio-behavioral sciences, as well as the application of this knowledge to patient care.

- 2.1: Compare and contrast normal variation of pathological states the structure and function of the human body across the lifespan.
- 2.2: Apply established and emerging foundational/basic science principles to healthcare.
- 2.3: Apply evidence-based and spoke of clinical sciences to diagnostic and therapeutic decision-making and clinical problem solving.
- 2.4: Apply principles of epidemiological sciences to the identification of health problems, risk factors, treatment strategies, resources, and disease prevention/health promotion efforts for patients and populations.
- 2.5: apply principles of socio-behavioral sciences to patient care including assessment of the impact of psych social, cultural, and societal influences on health, disease, care seeking, adherence, and barriers to care.
- 2.6: Demonstrate an understanding of the potential for engagement in creation, dissemination and application of new healthcare knowledge.

PGO 3

Demonstrate the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and life-long learning.

- 3.1: Identify and perform learning activities to address gaps in one's knowledge, skills and/or attitudes.
- 3.2: demonstrate a basic understanding of quality improvement principles and their application to analyzing and solving problems inpatient and/or population-based care.
- 3.3: Accept and incorporate feedback into practice.
- 3.4: Locate, appraise, and assimilate evidence from scientific studies related patient's health problems.
- 3.5: obtain and utilize information about individual patients, populations or communities to improve care.
