

TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER

Department of Pediatrics – El Paso

CONTINUITY CLINIC POLICY

PL-1 Residents

Each PL-1 pediatric resident will be assigned to a site for continuity clinic commencing the first week of August of his or her PL-1 year. Assignment location will be Alberta Clinic.

Residents will be assigned to this site one afternoon per week excluding Wednesdays, which are reserved for the didactic program.

Each resident is assigned to a continuity clinic team. Continuity clinic is organized on a team concept. One faculty will be leading the team.

Patients are scheduled and resident attendance is expected throughout the year except on approved vacation or when ill. When resident is on vacation or ill, the rest of the team members will attend to his/her patients.

PL-2 Residents

Each PL-2 pediatric resident will be assigned to one afternoon continuity clinic per week. The PL-2 will continue to follow established patients from the previous year, hence continuity. There will be no continuity clinic assignments on Wednesdays because of the didactic program. PL-2 resident continuity clinic assignments begin the first week of July, and are organized on a team concept. One faculty will be leading the team.

PL-3 Residents

Each PL-3 pediatric resident will be assigned to one afternoon continuity clinics per week, following the team concept as described for PL-1 and PL-2.
